WORK EXPERIENCE

Software Engineer
Unisys India

08/2022 - Present
Achievements/Tasks

- Currently working on development of a software to reduce client's effort and enhance user interface in the process of installation of utilities on the Unisys proprietary operating system

Student Intern
Unisys India

08/2021 - 11/2021   *Bangalore, India*
Achievements/Tasks

- I've worked with various Microsoft Power Platform tools such as PVA, Power Automate, QnA Maker and many more to create an NLP / NLU bot to help users in their daily queries.
- I have worked with Microsoft Bot Framework tools to create a bot which increased the productivity of developers by 30% and build the bot faster.

PROJECTS

Agrobuddy (12/2021 - 06/2022)
- Agrobuddy is project built using the Edge-AI paradigm which is an amalgamation of two completely different technologies Edge Computing and Artificial Intelligence into creating one new entity.

Netflix Clone (11/2021 - 11/2021)
- Netflix Clone is a project built to understand the building blocks of React JS framework and using Axios to perform Networking along with simple state management with useState hooks to implement UI similar to Netflix.

Project Name

EDUCATION

B.E, Computer Science and Engineering
NMIT, Bengaluru

08/2018 - 06/2022   *8.27*

Pre University
Narayana PU College
